OH Service from Pole, Pole# : _____ UG Service from; Riser-Pole # : _____ Padmount # : _____

Customer Loading

Brief Description of Work

The two (2) requested new services will be routed from the Eversource service point at Logan Airport to new Main-Tie-Main switchgear with provisions for a future third service connection as connected load increases. The intent for the new services is to provide power to new building construction/ expansion of an existing Airport terminal as well as a new 2000 space parking garage. Additional capacity is being requested to support the transfer of existing loads at the airport to alleviate some of the existing overloading conditions on the existing Eversource services that supply

Type of Load	New Connected Load in KVA	
	Single Phase	Three Phase
Lighting		397
Electric heat		81.5
Air Conditioning		2528
Refrigeration		
Cooking		
Electric Dryer		
Water Heater		463.5
Computer		169
Process Equip.		
Motors/Elevators		2119.5
Miscellaneous		5075
Totals		10833.5

Number of Meters Required:

Residential: _____ Commercial: Logan Public: _____
Main Switch Voltage: 13.8kV Amperage: 1200A Phase: 3
Service Voltage: 13.8kV Amperage: 485A Phase: 3
Facility Type (ie: school, hospital): _____ Airport Terminal _____ New Building Square Feet: 430000

If more than 1 meter is required, how will meters be labeled? (ie: Unit 1, 2, etc, Unit A, B, etc.)

Additional Equipment:

Generator: KW: N/A Phase: _____ Purpose: _____

Redacted

Motor(S) : Total # of motors: 250 Largest HP: 15 Phase: 3 Locked Rotor AMP: 116

Type of Starting Compensation (choose one): Hard Soft Capacitor VFD

*See Article 802 of EVERSOURCE Information and Requirements Book for Maximum LR current and Three Phase Protection *
