Subject: MA DPU Competitive Supply Companies - Failure to File 2022 Renewal Application List

Hello:

Pursuant to the [September 1, 2020 hearing officer memorandum](#) and D.P.U. 19-07-C, competitive supply companies must file a renewal application no later than July 1, 2022. In D.P.U. 19-07-C at 13-17, the Department outlined the actions that we would take when competitive supply companies fail to submit their annual license renewal application in a timely manner.

Department staff provided two courtesy emails to all competitive supply companies on June 1, 2022 and June 24, 2022 reminding competitive supply companies to file their license renewal application. The Department stated that for 2022, only, the deadline to file a license renewal application would be August 1, 2022 and, the 14-calendar day grace period will end on August 15, 2022. D.P.U. 19-07-C, at 17.

The competitive supply companies listed on this webpage: <https://www.mass.gov/info-details/competitive-supply-companies-that-have-not-filed-a-renewal-application> have not filed a 2022 renewal application as of August 15, 2022. These competitive supply companies are prohibited from signing up new customers. Competitive supply companies that submit a complete license renewal application between August 16, 2022 and October 1, 2022 will regain the ability to submit enrollment requests for new customers starting October 2, 2022.

If you have questions about an **electric** renewal application, please contact the electric power division competitive supply team at: dpu.electricsupply@mass.gov.

If you have questions about a **gas** renewal application, please contact the gas division competitive supply team at: dpu.gassupply@mass.gov.
