Hello,

I am a Cambridge resident, I am writing to ask you not to grant permission to Eversource to build the substation in East Boston. The community has spoken loud and clear, they were not informed nor heard and they have very valid concerns about the viability of this project.

Building the substation close to a playground, in a flood prone area, and close to jet fuel tank adds more environmental hazards to an area already overburdened with pollution and risk. It also disregards the voices and the health impacts of the East Boston community.

I don't live in East Boston but I stand in solidarity with them. As a mother of young children, it breaks my heart to see that the lives of children living in Eastie matters so little to EFBS and Eversource.

Please don't grant the necessary permits to this project, there is a new administration and they should have a voice in a matter of such relevance and health impact. That is the appropriate and democratic thing to do.

Sincerely

Elena Fagotto
